

Itzam/Sharp Licensing & Support

A Guide for Prospective Customers

General Policy

Use of Itzam/Sharp is licensed in one of two ways: The GPL, or a closed-source, non-free license.

"GPL" refers to the GNU General Public License: <http://www.gnu.org/copyleft/gpl.html>

Itzam/Sharp is also available under non-free non-GPL license, the full text of which is at the end of this document.

Itzam/Sharp is 100% GPL, and if your use of it is 100% GPL compliant, then you never need to pay me for a license. In all other instances, you are better served by purchasing a non-free license. I am always open to discussing terms that fit an individual customer's needs and finances.

Support is a separate issue from licensing. Any request for custom development or technical support requires a separate agreement detailing what is expected from all parties. Licenses do not imply any level of support beyond simple delivery of Itzam/Sharp..

License Choices

If your application is licensed under the GPL, you are free and welcome to ship GPL-licensed Itzam/Sharp software with your application. By "application" I mean any type of software application, system, tool or utility. For doing this, you do not need a separate signed agreement with me, because the GPL text is sufficient.

As long as you never distribute Itzam/Sharp software (or software that forms a derivative work with Itzam/Sharp software) in any way, you are free to use it for powering your application, irrespective of the license the application is under.

You are allowed to modify GPL-licensed Itzam/Sharp software any way you like. If you choose to distribute any software that forms a derivative work with GPL licensed Itzam/Sharp software then the entire derivative work must be placed under the terms and conditions of the GPL.

You are allowed to copy Itzam/Sharp binaries and source code, but when you do so, the copies will fall under the GPL license.

A derivative work is a work that is based in whole or in part on another work. Your national copyright law may provide additional information on when a derivative work is formed. If you are unsure of whether or not your combination of GPL licensed Itzam/Sharp software with

other software forms a derivative work, then I recommend placing the derivative work under the GPL or purchasing a non-free license.

If your application is not licensed under the GPL and you intend to distribute Itzam/Sharp software (be that internally or externally), you must first obtain a non-free license to the Itzam/Sharp software.

So, if you include Itzam/Sharp in your non-GPL licensed application you need a non-free license for Itzam/Sharp.

If you desire a warranty, support or consulting on the use of Itzam/Sharp, you need a non-free license. Many users opt for the non-free license simply because under it, I take formal responsibility for the product.

Under the GPL license, there are no warranties or representations for the software.

If you represent a non-profit organization or an academic institution, I recommend you to put your own application under GPL. Thereby you are free to use Itzam/Sharp software free of charge under the GPL license.

If you are a private individual you are free to use Itzam/Sharp software for your personal applications, as long as you do not distribute them.

Please note that even if you ship a free demo version of your own application, the above rules apply.

Recommendations

To all non-free organizations I recommend the non-free license. Not only does this release you from the requirements of the GPL license, it also gives you a license letter from Itzam/Sharp where I assume responsibility for my product. The GPL license is an "as is" license with no warranties whatsoever.

To all GPL/Open Source enthusiasts I recommend licensing Itzam/Sharp under the GPL license.

To anyone in doubt, I recommend the non-free license. It is never wrong. I am able to sell non-free licenses at prices well under the industry average, and this is without compromising my own profitability.

Older Versions

Itzam/Sharp is based on code that has been around in many forms for several years. Some of it was used in my early C++ programming books; other pieces of code stem from web site articles or personal development projects. A few classes resulted from non-free projects. In all cases, the code is mine, I wrote it, and I'm making it available simply because I see no reason why I shouldn't.

Because of the long history of this code, older versions were released under an inconsistent mish-mash of licenses. In 2007, I formalized Itzam/Sharp under the GPL, in keeping with standard industry practices. I may have my quibbles with the GPL, but it has the advantages of being well-understood and well-debated.

If you have any questions on Itzam/Sharp licensing, feel free to contact me at [via e-mail at scott.ladd@coyotegulch.com](mailto:scott.ladd@coyotegulch.com).

Itzam/Sharp

SOFTWARE LICENSE AGREEMENT

I. Introduction

This is a license agreement between Scott Robert Ladd ("Developer") and _____ ("Licensee") in which Developer grants Licensee certain rights in the software subject to the terms and conditions of this agreement. Any rights granted under this license do not limit or eliminate rights belonging to Developer.

II. Definitions

"Software" means version 4.0 of Itzam/Sharp, a portable embedded database engine written for the Microsoft .Net platform.

"Derivative Work" means a work that is based on the Software and that, if prepared without permission of the Developer, would constitute a copyright infringement, including for example compiled executable versions of the Software that are prepared by Licensee.

III. Items Provided by Developer

Developer shall furnish Licensee the Software, as described above, in computer-readable source code form.

IV. License

A. Developer grants to Licensee, subject to the terms and conditions herein, a worldwide non-exclusive license to use and modify (and have used and have modified) the source code, and an unlimited right to use, execute, reproduce, have reproduced, sell, license, lease, or otherwise transfer copies of Derivative Works infringement, including for example compiled executable versions of the Software that are prepared by Licensee.

B. This agreement shall continue in perpetuity, and applies to all bug-fixes and minor enhancements in the Itzam/Sharp series version number in the form 1.0.##

C. Developer hereby reserves all rights in Software not specifically granted by this license agreement.

V. Payment

The fee for the licensed Software is US \$995, and Licensee agrees to pay this fee in U.S. Dollars immediately upon execution of this agreement and delivery of the Software. No additional royalty payments will be required for reproduction and distribution of Derivative Works.

VI. Title

A. Developer shall retain sole and exclusive ownership of the copyright on the Software.

B. This agreement does not provide Developer with title or ownership to any enhancements or modifications made by Licensee.

VII. Warranty

A. Developer warrants that he has the legal right to grant Licensee the license as set out in this agreement and that such license does not infringe any third parties' property or personal rights, other than as stated in Section VII.

B. Except for the foregoing, Developer makes no other warranties and DEVELOPER SPECIFICALLY DISCLAIMS ANY WARRANTIES CONCERNING THE SUFFICIENCY OF THE SOFTWARE OR SOURCE CODE, ITS MERCHANTABILITY OR ITS FITNESS FOR ANY PURPOSE. ALL SOFTWARE AND SOURCE CODE DELIVERED UNDER THIS AGREEMENT SHALL BE DELIVERED "AS IS".

VIII. Entire Agreement

This agreement sets forth the entire understanding between the parties. It may be changed or modified only in writing and must be signed by both parties.

IX. Assignment

Neither party may sell, transfer, assign, delegate, or subcontract any rights or obligations under this agreement without the prior written consent of the other party.

XI. Laws

This contract shall be construed under the laws of the State of Florida and the federal laws of the United States of America.
